Vizianagaram, India

Projects

Portfolio 📄 | [HTML](#), [CSS](#), [Bootstrap](#), [JavaScript](#)

- Built a **dynamic** portfolio website that showcases completed projects with detailed case studies, demonstrating hands-on experience, problem-solving abilities, and project outcomes across multiple domains.
- Integrated a skills section using interactive visualizations and endorsements to provide clear evidence of technical proficiency, adaptability, and relevant expertise.
- Designed the “About **Me**” section to present a professional narrative, highlighting personal branding, educational background, and career achievements for enhanced recruiter engagement.

Career Path Pro 📄 | [HTML](#), [CSS](#), [Bootstrap](#), [JavaScript](#)

- Designed and developed a **dynamic** career guidance platform, enabling users to login securely and take a personalized quiz to assess skills and interests.
- Implemented an **intelligent** recommendation system that analyzes quiz responses to suggest suitable career paths tailored to each user's profile.
- Integrated interactive career roadmaps with curated learning resources and external links, providing users with structured guidance for skill development and career progression.

Simon Says Game 📄 | [HTML](#), [CSS](#), [JavaScript](#)

- Developed a browser-based Simon Says game using **dynamic** DOM manipulation, responsive design, and real-time event handling.
- Implemented **dynamic** game logic in JavaScript to generate random sequences, manage user input, and deliver adaptive feedback with a scoring system.
- Built a modular web app using HTML, CSS, and JS with sequence playback, error handling, and responsive design for all devices.

Technical Skills

- **Programming Languages:** JavaScript, Java, C, SQL
- **Frontend Technologies:** HTML, CSS, Bootstrap
- **Backend Technologies:** Node.js, Express.js, RESTful APIs
- **Databases:** MYSQL
- **DevOps & Tools:** Git/GitHub

Community

Web Contributor

IEEE Student Chapter (IEEE)

Aug 2025 – Sep 2025

Visakhapatnam, India

- Developed and launched a full scale web application for a hackathon, attracting participation from over **74+ teams**.
- Managed event operations supporting **300+ attendees**, ensuring seamless registration, coordination, and user engagement.

Achievements

- Achieved **1st Place** 24hr hackathon by developing an **innovative** web application on Neuro Diverse Individuals, demonstrating exceptional problem-solving, teamwork and technical skills.
- Achieved **1st Place** in National-Level Coding Challenge at TechRitz, demonstrating strong problem-solving and quick thinking.
